Abstract

The Heavy Metal Tested & Certified standard for mixed infant meals combining meat and grains, stated as-consumed. Every limit is the strictest maximum level any credible government sets, converted to the as-consumed basis, with read-across where no government regulates the exact product.

1 | How every number on this standard is set

HMTc Method v2.0 (government-limit default, 8:1 basis, read-across)

2 | Master limit table

All values in ppb (µg/kg), as consumed basis. A brand meeting every value qualifies for the mark.

ANALYTE	HMTC LIMIT	BASIS
Lead (Pb)	10	government maximum level (Brazil)
Cadmium (Cd)	40	government maximum level (EU 2023/915)
Total arsenic (tAs)	50	government maximum level (India)

Inorganic arsenic (iAs)	20	government maximum level (EU 2023/915)
Mercury, total (tHg)	8	government maximum level (Israel)
Methylmercury (MeHg)	—	not compiled
Nickel (Ni)	500	government maximum level (EU 2024/1987)
Tin (Sn)	5,000	government maximum level (India)
Aluminium (Al)	500	read-across (Australia / New Zealand)
Total chromium (Cr)	500	government maximum level (Hong Kong)
Hexavalent chromium (Cr-VI)	—	not compiled

3 | Derivation — where each number comes from

Every cell traces to one named sovereign maximum level (the strictest for the nearest analog), or to an explicit control, not-material, or species-bounded determination. No occurrence statistic selects a certification value.

ANALYTE	HMTC	SOVEREIGN ANALOG / DETERMINATION
Lead (Pb)	10	government maximum level (Brazil)
Cadmium (Cd)	40	government maximum level (EU 2023/915)
Total arsenic (tAs)	50	government maximum level (India)
Inorganic arsenic (iAs)	20	government maximum level (EU 2023/915)
Mercury, total (tHg)	8	government maximum level (Israel)
Methylmercury (MeHg)	—	not compiled
Nickel (Ni)	500	government maximum level (EU 2024/1987)
Tin (Sn)	5,000	government maximum level (India)
Aluminium (Al)	500	read-across (Australia / New Zealand)
Total chromium (Cr)	500	government maximum level (Hong Kong)
Hexavalent chromium (Cr-VI)	—	not compiled

READ-ACROSS

STATUS AND LICENCE

A normative certification standard, editorially reviewed and version-controlled in-house; every value traces to a named sovereign maximum level, disclosed in the derivation. © 2026 Institute of Contaminant Standards / Heavy Metal Certified. All rights reserved.

COMPETING INTERESTS

This standard is published by the Heavy Metal Tested & Certified (HMTc) program, operated by the Institute of Contaminant Standards. Its statements about government regulations, toxicology, and occurrence are sourced to the cited primary and expert-body records and to the independently maintained Heavy Metal Index; the program's own certification thresholds are not used as evidence for any factual claim made here.

DATA AVAILABILITY

The works this standard draws on are listed in full in the references above and on the standard page at https://heavymetalcertified.com/standards/mixed-meals. Primary legal instruments and expert-body assessments are
