Abstract

The Heavy Metal Tested & Certified standard for seaweed and kelp foods — nori, wakame, kombu, dulse — dried, stated as sold. Seaweed concentrates arsenic and heavy metals on drying, and the ceilings reflect the strictest government maximum for the dried product form; every limit is the strictest maximum level any credible government sets for dried seaweed.

1 | How every number on this standard is set

HMTc Method v2.0 (government-limit default, 8:1 basis, read-across)

2 | Master limit table

All values in ppb (µg/kg), as sold basis. A brand meeting every value qualifies for the mark.

ANALYTE	HMTC LIMIT	BASIS
Lead (Pb)	5,000	government maximum level (Israel)
Cadmium (Cd)	500	government maximum level (FR)
Total arsenic (tAs)	5,000	government maximum level (Israel)

Inorganic arsenic (iAs)	1,000	government maximum level (Australia / New Zealand)
Mercury, total (tHg)	100	government maximum level (FR)
Methylmercury (MeHg)	≤ tHg	bounded by tHg (reflex speciation)
Nickel (Ni)	30,000	government maximum level (EU 2024/1987)
Tin (Sn)	200,000	read-across (EU 2023/915)
Aluminium (Al)	100,000	read-across (China)
Total chromium (Cr)	2,000	read-across (GB 2762)
Hexavalent chromium (Cr-VI)	10	read-across (CA SWRCB)

3 | Derivation — where each number comes from

Every cell traces to one named sovereign maximum level (the strictest for the nearest analog), or to an explicit control, not-material, or species-bounded determination. No occurrence statistic selects a certification value.

ANALYTE	HMTC	SOVEREIGN ANALOG / DETERMINATION
Lead (Pb)	5,000	government maximum level (Israel)
Cadmium (Cd)	500	government maximum level (FR)
Total arsenic (tAs)	5,000	government maximum level (Israel)
Inorganic arsenic (iAs)	1,000	government maximum level (Australia / New Zealand)
Mercury, total (tHg)	100	government maximum level (FR)
Methylmercury (MeHg)	≤ tHg	bounded by tHg (reflex speciation)
Nickel (Ni)	30,000	government maximum level (EU 2024/1987)
Tin (Sn)	200,000	read-across (EU 2023/915)
Aluminium (Al)	100,000	read-across (China)
Total chromium (Cr)	2,000	read-across (GB 2762)
Hexavalent chromium (Cr-VI)	10	read-across (CA SWRCB)

STATUS AND LICENCE

A normative certification standard, editorially reviewed and version-controlled in-house; every value traces to a named sovereign maximum level, disclosed in the derivation. © 2026 Institute of Contaminant Standards / Heavy Metal Certified. All rights reserved.

COMPETING INTERESTS

This standard is published by the Heavy Metal Tested & Certified (HMTc) program, operated by the Institute of Contaminant Standards. Its statements about government regulations, toxicology, and occurrence are sourced to the cited primary and expert-body records and to the independently maintained Heavy Metal Index; the program's own certification thresholds are not used as evidence for any factual claim made here.

DATA AVAILABILITY

PUBLICATION HISTORY

The works this standard draws on are listed in full in the references above and on the standard page at https://heavymetalcertified.com/standards/seaweed-kelp-foods. Primary legal instruments and expert-body assessments are named with their public identifiers; the underlying occurrence and toxicology corpus is maintained on the Heavy Metal Index.
