Abstract

The Heavy Metal Tested & Certified standard for mixed infant meals combining meat and grains, stated as-consumed. Every limit is the strictest maximum level any credible government sets, converted to the as-consumed basis, with read-across where no government regulates the exact product.

1 | How every number on this standard is set

HMTc Method v2.0 (government-limit default, 8:1 basis, read-across)

2 | Master limit table

All values in ppb (µg/kg), as consumed basis. A brand meeting every value qualifies for the mark.

ANALYTE	TIER	HMTC LIMIT	BASIS
Lead (Pb)	Tier 1	10	government maximum level
Cadmium (Cd)	Tier 1	40	government maximum level
Total arsenic (tAs)	Tier 2	50	government maximum level
Inorganic arsenic (iAs)	Tier 1	20	government maximum level

Mercury, total (tHg)	Tier 1	8	government maximum level
Methylmercury (MeHg)	Tier 1	—	not compiled
Nickel (Ni)	Tier 2	500	government maximum level
Tin (Sn)	Tier 2	5,000	government maximum level
Aluminium (Al)	Tier 2	500	human-grade read-across (Australia / New Zealand)
Total chromium (Cr)	Tier 2	500	government maximum level
Hexavalent chromium (Cr-VI)	Tier 2	—	not compiled

3 | Derivation — where each number comes from

Every cell traces to one named sovereign maximum level (the strictest for the nearest analog), or to an explicit control, not-material, or species-bounded determination. No occurrence statistic selects a certification value.

ANALYTE	HMTC	SOVEREIGN ANALOG / DETERMINATION
Lead (Pb)	10	government maximum level
Cadmium (Cd)	40	government maximum level
Total arsenic (tAs)	50	government maximum level
Inorganic arsenic (iAs)	20	government maximum level
Mercury, total (tHg)	8	government maximum level
Methylmercury (MeHg)	—	not compiled
Nickel (Ni)	500	government maximum level
Tin (Sn)	5,000	government maximum level
Aluminium (Al)	500	Australia / New Zealand — human-food analog
Total chromium (Cr)	500	government maximum level
Hexavalent chromium (Cr-VI)	—	not compiled

STATUS AND LICENCE

Editorially reviewed in-house; no external peer review has been completed on this reference. Published as a preprint with its review state tracked on the article page. Released under CC BY 4.0.

COMPETING INTERESTS

This briefing is published by the Heavy Metal Tested & Certified (HMTc) program, operated by the Institute of Contaminant Standards. Its statements about government regulations, toxicology, and occurrence are sourced to the cited primary and expert-body records and to the independently maintained Heavy Metal Index; the program's own certification thresholds are not used as evidence for any factual claim made here.

DATA AVAILABILITY

The works this reference draws on are listed in full in the references above and on the briefing page at https://heavymetalcertified.com/standards/mixed-meals. Primary legal instruments and expert-body assessments are named with their public identifiers; the underlying occurrence and toxicology corpus is maintained on the Heavy Metal Index.
